## 16<sup>TH</sup> CONFERENCE OF THE ASIAN CRYSTALLOGRAPHIC ASSOCIATION

Dear Friends and Colleagues,

Warm greetings from AsCA2019! We are excited to update you about arrangements for the 16<sup>th</sup> Conference of the Asian Crystallographic Association (AsCA 2019, <https://asca2019.org>) to be held at University Town, National University of Singapore, during 17 – 20 December 2019, being preceded by several crystallographic Workshops during 15 – 17 December.

Registration and Abstract submission for Oral and Poster presentations are now open! Please take advantage of our Early Bird Registration fees to save money!

We are now accepting applications online for the prestigious **Rising Star** and **IUCr Young Scientists Awards**. The last date for submission for these awards along with Oral presentation is 12 August 2019.

We are also accepting online applications for **Flash presentations** (3-minute talks on 17 December). We are very much excited to introduce these in AsCA for the first time.

There will be many cash awards for the **best Poster presentations and best Flash presentations**. Please submit your best work.

We have excellent **Plenary and Keynote speakers** confirmed to speak at the conference!

**In-campus accommodation:** NUS offers nearly 300+ inexpensive accommodation packages (\$\$ 39 – 96 per room night) available for delegates at the Conference venue, UTown. This will be a wonderful experience during the Workshops and AsCA 2019. Please book well in advance.

**Sponsorship and Exhibition:** We are receiving very good responses from sponsors and exhibitors alike. You will have an opportunity to meet and get to know exhibitors as well as learn more about the recent advances in software and hardware in the world of crystallography!

**Singapore News:** There are so many attractions for you and your family in Singapore! The latest addition is the Jewel at the Changi Airport. Please check it out at <https://www.youtube.com/watch?v=LLoCFQf1YG8>.

We heartily welcome you, your students, Post-Docs and colleagues to Singapore to participate in this Conference (and Workshops). Please do not miss the opportunity to be with 500+ crystallographers in Singapore! You may also consider spending your Christmas holidays with your family members in Singapore!

Yours sincerely,

**JJ Vittal**

Chair, Local Organizing Committee
